Education

Al-Azhar University-Gaza B.S. in Computer Systems Engineering
High Distinction (top 2% of class, GPA 91.24%)

Sep 2018 - Feb 2023

Professional Experience

Front-end Developer

Oct 2023 - Present

Master Team

Remote

- Building reusable front-end components, streamlining development, and ensuring consistency across multiple projects
- Developing highly interactive and dynamic web applications using Angular for various enterprise products
- Implementing performance optimizations to achieve fast loading times and smooth UX
- Collaborating with cross-functional teams to integrate complex business logic and features seamlessly

Front-end Developer

Jul 2022 - Oct 2023

Unit One Group

Gaza - Palestine

- Developed UI modules, editable data tables, and location-aware features
- Created an internal employee management tool using Angular for over 500 employees
- Enabled timesheet tracking, leave requests, and external team collaboration

Front-end Developer

May 2023 - Oct 2023

Fluxir

Remote

- Contributed to a Compliance-as-a-Service (CaaS) platform, enhancing Angular-based web apps
- Applied effective state management to improve performance and ensure data integrity
- Integrated new modules and features in collaboration with the backend and design teams
- Diagnosed and fixed bugs to improve stability and user experience

Full Stack Developer

Apr 2022 - Jun 2022

Google For Startups

Remote

- Built a website MVP for a climate-change startup
- Created interactive surveys with Typeform and developed APIs using Firebase Cloud Functions and Node.js
- Reduced data fetch latency and visualized analytics with Angular and PrimeNG

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3 familiar with Java & Python

Frameworks: Angular, ReactJS, NextJS, ExpressJS, PostgreSQL, Flutter (basic)

Tools & Tech: Firebase Cloud Functions, Git/GitHub, Typeform, RxJs

UI Libraries: Material UI, Ant Design, PrimeNG, Syncfusion, Tailwindcss, HeroUli

State Management: Context API, Redux, NGXS

Testing: CodeceptJS
